

# MindCook

Mind cook is an application that “predicts” guests' food according to answers given to the questionnaire

## The inner working of the MindCook :

There are 9 questions in the questionnaire. Each question has a value of 0 or 1. readMyMind function has 5 possible outcomes: *Avocado Benedict*, *Strawberry Sundae*, *Soy Salmon*, *Cauliflower Dipper*, *Blonde*.

Clicking on the answer button will show the answer in the cell below the question. Answers are final, and can not be changed. Clicking on the left Answer will add 1 to the answer score, clicking on the right button will add 0. Depending on the answer score, the function will show the recommended meal beneath the questionnaire. The Diagram below shows which result leads to which recommendation.
